

METABOTS

BLOX+

Powered by SCOTTY , a Follow-Me Technology

METABOTS

Blox+ is a modular trolley that is fully customizable to your needs. It may be equipped with SCOTTY, a Follow-Me Technology for an effortless experience for the user.

SCOTTY

Follow-Me technology

SCOTTY is a smart technology that comprises of a transmitter, a receiver, strong sensors, powerful traction wheels and batteries.

When paired with BLOX+, it enables it to track and follow you, wherever you go, eliminating the need for physical strength.

Modular and Versatile

Blox+ comes in many different configurations and users can choose to configure it to their requirements. If a specific variation is not available, users can also have it customized.

For the full autonomous experience, one may deploy both SCOTTY empowered Blox+ and M45 seamlessly.

Operator + Robot + Trolley working as team autonomously.
