

METABOTS

TESTA MOP II with IoT

METABOTS

Battery operated **Testa Mop II (T2)** is an ultra compact scrubber dryer that provides high performances, especially in tight spaces and edges. It is suitable on almost all types of surfaces and provides a faster and more thorough cleaning result than manual cleaning. Its light weight allows for use in areas without lifts as it can be easily carried up and down stairs.

Key Features

Minimal space

Handle can be folded to minimize machine size. Machine is light and can be easily transported

Easy maintenance

Big tank opening for easy cleaning. easily accessible battery compartment to allow fast exchange of battery

Ergonomic handle with simple controls

T2 can be easily adjusted with a single button, users can quickly use the machine with easy push of buttons

Rotatable curved squeegee

Reliable fluid suction even in tight corners. Reverse suction is possible if required

TECHNICAL SPECIFICATIONS

Cleaning Width	280 mm
Squeegee Width	340 mm
Cleaning Efficiency	800 m ² / hour
Brush Speed	150 RPM
Clean Water Tank	6 L
Recovery Tank	9 L
Scrubbing Operations	Up to 2 hours
Charging Duration	1 hour
Brush Motor	200 W
Vacuum Motor	120 W
Battery Type	12 Ah / 16 Ah Lithium-ion
Weight	20 Kg
Dimensions (L x W x H)	584 x 401 x 1040 mm
